Bulgari – Triclosan

Dear Mr. Forter,

We thank you for your e-mail and the interest in our Brand.

Bulgari always has customer satisfaction at heart and our foremost priority is to ensure the safety and quality of products placed on the market. Bulgari, a European Cultural and Creative Entrepreneur, complies with all regulations in force.

Bulgari uses Triclosan (CAS n° 3380-34-5) in its formulations in full accordance with the maximum safe concentration laid down in the Annex V of the Cosmetics Regulation (EC) 1223/2009.

In view of the increasing questions over the potential environmental impact and the antimicrobial resistance of Triclosan, as well as the prohibition of its use as a preservative by the SFDA (Saudi Food and Drug Authority), Bulgari made the decision to phase out Triclosan in its products.

We are confident that the care and rigor which drive our day to day activities and decision-making will enable Bulgari to meet consumer high expectations and satisfaction, yet increasing its confidence in our brand and products.

Very Best regards,

BVLGARI Parfums Client information Service [contact.fsc@bulgari.com](mailto:contact.fsc@bulgari.com)
